The Turkish right attacked the Russian

left at 3 o'clock this morning. The two armies fought all day long. For fourteen hours attack, repulse, and counter attack continued. The fighting incessant, and the noon sun was only seen at intervals through the smoke The Russians were persistently brave, and pursued their well-known policy of reserving their fire until the attacking column was at very close range, when, after their discharge, they sprang forward and received their foes with the bayonet. It was not always that the Turks wavered. Some portions of the Turkish line fought better than the others. DESPERATE HAND-TO-HAND FIGHTING

occurred on two occasions. The Turks atdefensive position, but were defeated in each and every attempt. General Louis Melikoff commanded the defense in person. He was enthustastically cheered wherever he ap-peared. Both the Russians and the Turks were in full strength. By a cavalry dash about daylight the Turks captured the little village of Kezzil Topa, a place wholly atenable to fortify, and consequently aban-doned by the Russians long since. This place the Turks held throughout the day, BECAUSE THE FIGHT AT THE FRONT WAS SO ACTIVE that no man could well be spared to dis-

lodge them. The efforts of the Turks to capture Kuruk Para were desperate, and certainly did not fail from want of persistency. Prior to the opening of the attack only few companies of the regiment forming the extreme Russian left had been encamped in front of the little town, but shortly after idnight, General Louis Melikoff having been informed of the advance of the enemy wo entire divisions, each division consi ing of four regiments of 2,500 men, were thrown into the place before 5 o'clock in the morning. The greater part of the second division was held as a reserve, and did not come into action until late in the afternoon. THE PIEST SHOCK OF THE ATTACK

vas received by the two regiments of infan wounded five Mussulmans of the village of occupation of Karuk Dara, and in these two regiments the losses were terrible, some companies being literally wrecked. They stood their ground, however, until relief Ahmed Eil Mustapha, of the village of Echedge, and his child, ten years old, called out the day. The repulse of the attacking out the day. I saw the greater came, and that was the main thing. These army was unequivocal. I saw the greater portion of the fight, and the retreat of the Turks at nightfall.

LOSSES ON DOTH SIDES were very heavy, but at this time, within two hours of the ce sation of the fight, it is impossible to accurately estimate the num ber of killed and wounded. It was reported about two o'clock that General Komasso Tchavsheradze was killed, but it tranpire that he was only badly wounded. I was assured of this fact by one of his aids within an hour, who tells me that the General doing well.

THEO, HYATT, President july18-d2m Many Who are Suffering from the effects of the warm weather and are debilitated, are advised by physicians to take moderate amounts of whisky two or three times during the day. In a little while those who adopt this advice frequently increase the number of "drinks" and in time become confirmed inebriates. A beverage which will not create thirst for intoxicating liquors, and which is intended especially for the benefit of debilitated persons, whether at home or abread, is Dr. Schenck's Sea Weed Tonic, Containing the juices of many medicinal heris, this preparation does not create an appetite for the intoxicating cup. The nourbhing and the life supporting properties of many valuable natural productions contained in it and well known to medical men have a most strengthening influence. A single bottle of the Tonic, will demonstrate its valuable qualities. For debility arising from sicknex, over exertion or from any cause whatever, a wine giassful of Sea Weed Tonic, taken after meals will strengthen the stomach and create an appetite for wholesome food. To all who are about leaving their homes, we desire to say that the execlient effect of Dr. Seienck's reasonable remedies, Sea Weed Tonic and Mandrake Pilis, are particularly evident when taken by those who are injuriously affected by a change of water and diet.
